

# Buprenorphine X-Waiver Training Series

March - July 2021

This series is designed to increase treatment capacity for opioid use disorders by training more prescribers to be able to treat opioid use disorders with buprenorphine. Participants may choose from one of eight courses being held across Wisconsin between March and July 2021.

Each session is presented as a live four-hour activity, which, when paired with ASAM's four-hour on-demand course, will provide necessary education for participants to qualify for their Buprenorphine XWaiver. Prior to the four-hour live course, participants will be provided instructions for completing the first four-hours of education online, after which they will attend the live four-hour activity. When all is said and done, participants will qualify to apply for their X-Waiver. ASAM offers the additional 16 hours required for NPs, PAs, and other CNSs for no additional cost.

## ACCREDITATION
